

Does stuff disappear?

Name	Class	Date
------	-------	------

1 • My prediction

100 g of water and 20 g of salt are on the scale together. The salt is stirred in until it vanishes. The empty cup goes back on.

What will the scale read? Circle one.

HEAVIER	LIGHTER	THE SAME
---------	---------	----------

I think this because _____

2 • What the scale said

Test	Before (g)	After (g)
Salt into water		
Container A — sealed bag		
Container B — open beaker		

3 • Finish these sentences

When the salt dissolved, the mass _____ .
This tells me the salt _____ .
The sealed bag stayed the same because _____

The open beaker got lighter because _____

Word bank mass • dissolved • gas • escaped • stayed the same • got lighter • still there • sealed • new substance
