

Put the method in order

Name _____ Group _____ Date _____

My method: **FILTERING** / **DECANTING** (circle one)

Write **1, 2, 3** and so on in the boxes to put the steps in the right order for **your** method, starting at 1.

Some steps are for one method only — they are labelled. Leave those boxes empty if they are not for your method.

Two steps do not belong in **any** method. Put a cross in those two boxes instead of a number.

No.	Step
	Weigh the empty basin and write the number down.
	Fold the filter paper into a cone and sit it in the funnel. (filtering only)
	Pour the mixture slowly through the filter, into the second beaker. (filtering only)
	Let the sand settle, then pour the liquid off it carefully. (decanting only)
	Stir the sand until it dissolves.
	Pour the liquid into the weighed basin.
	Hand the basin to the teacher to go on the frypan.
	Wait for the water to evaporate away.
	Pour the salt down the sink and start again.
	Let the basin cool for five minutes.
	Weigh the basin with the salt in it.
	Subtract the empty basin mass to find the salt recovered.

My results

Name	Group	Date
Empty basin		
Basin with salt in it		
Salt I got back		
Salt I started with	8 g	
How much is missing		

Finish these sentences

My method was **FILTERING** / **DECANTING** (circle one)

The sand was separated out because _____

_____ .

The salt went straight through because _____

_____ .

The white solid in my dish is _____ .

I did not get all 8 grams back because _____

_____ .

The missing salt was NOT destroyed. It is _____

_____ .

Word bank dissolved • too small • filter paper • left in the beaker • evaporated • salt • still damp • source of error
